**Section 2.0 QUALITY POLICY**

It is the policy of **SEAOCEAN** to control the quality of all services to ensure compliance with recognised standards and customers' written specified requirements.

SeaOcean provides assurance that quality will be maintained at levels which will satisfy the expectations of our customers.

Our system is based on the identification and management of risk.

This risk based approach to the management of our business ensures that our work is carried out in a manner which not only meets the technical requirements but is as safe to staff, customers, the general public and the environment as is reasonably practicable.

Through the involvement of our staff and through the systematic application of this management system, top management and each employee seek continuous improvement of our services to our customers.

The SeaOcean Quality Management System has been designed to meet the requirements of the most recent issue of BS EN ISO 9001.

**Quality Objectives** - to satisfy our customers in terms of product or service quality and response time.

**Key Performance Indicators:**

- Quality of work as judged by our Customers
- Meeting our work programmes as judged by our Customers

This policy statement has the complete support of the Board of Directors of SeaOcean Limited.
